

InoBat has signed a Memorandum of Understanding with Key Players in the Kosice Region

On the 12th of December, the InoBat company has signed a Memorandum of Understanding with the representatives of Technical University of Kosice, University of Pavol Jozef Safarik in Kosice, the Slovak Academy of Science (all three being a part of research centre Promatech) and the Kosice Self-Governing Region. The signing of the memorandum represents the beginning of our cooperation and joint support related to the realisation of the InoBat project, especially in the field of e-mobility. Thanks to everyone who had made this happen - we are very excited about our common future plans!
