

InoBat is Planning to Cooperate with Top Universities and Research Centers in Slovakia

The Slovak battery production and R&D company InoBat plans to work closely with universities in Slovakia to attract the best talents for their envisaged projects, which will revolutionise the battery market in Europe. During a recent lecture “How to Make World-Class Batteries from The Heart of Europe” held at the Scientific Centre for Advanced Materials and Technologies Promatech in Košice, Marian Bocek, the Co-founder of InoBat and Marian Smik, Chairman of the Slovak Battery Alliance talked about its vision on the future of e-mobility.

The 1.5-hour long discussion detailed the plans for the projects, which will in the first phase focus on the building of a production demo line, with a view to further expand it to constructing a giga-factory with a capacity of 10GwH. In the company of Professor Pavol Slovak, the Rector of University of Pavol Jozef Safarik in Kosice and Professor Stanislav Kmet, the Rector of TUKE as well as other representatives of the academia and the student body, InoBat and SBaA members highlighted that only by cooperating with the top talents from universities it can fully access the whole value chain and ensure a continuous R&D to bring the best energy solutions on the market.

If you wish to learn more about the possible cooperation, please contact us at www.inobat.eu
